

Last Order Notification: PA-CONTROL CPU4

Dear Business Partner,

We took this letter as a reason to inform you about the delivering situation of the PA-CONTROL type CPU4 including the associated options.

Throughout the last years the CPU4-version of the PA-CONTROL was increasingly substituted by more modern and efficient control products, as for example the PA-CONTROL Touch or PA-CONTROL ipo.

Also in the area of stepper and servomotor controls, our power output stage LE3-80/LE8-80 as well as the servo amplifiers of the servoTEC-S2-FS series substituted the previous CPU4-stepper motor cards.

Due to the advanced life span of the PA-CONTROL CPU4 product family, supplier-components are increasingly unavailable. In order to guarantee an adequate spare parts-availability, we have to inform you that the following products can only be ordered at IEF-Werner until the end of 2017.

- PA-CONTROL Control device
- PA-CONTROL Single
- PA-CONTROL Compact
- LV-Single
- LV-Unit
- PA-CONTROL MP
- PA-CONTROL Smart

Please find attached detailed description of the procedure of the discontinuation.

We are pleased to help you with information regarding the change to our current control products.
