Declaration of conformity according to the REACH-directive (1907/2006/EG), SVHC-list of candidates of 21 January 2025

IEF-Werner GmbH produces adjusting slides, handling systems, work piece transport, palletisers and NC controls.

We receive the products and parts primarily from European suppliers, in individual cases also from non-European suppliers. With respect to the customer, we are liable to the information obligation according to directive Art. 33 of the REACH-directive, if one of our delivered products contains an alarming substance (SVHC substance) in a mass concentration of more than 0.1 percent.

The list of the SVHC substances is published on the websites of the European Chemical Agency (ECHA) and is continuously updated.

In our own interest and in order to ensure a high delivery and product safety, we take this information obligation very seriously. We meet the legal requirements according to Art. 33 of the REACH directive by the following procedures:

- Our EU product suppliers are obligated to inform us without being asked and without delay, if their delivered products contain a SVHC substance more than 0.1 mass percent. If we receive an information regarding this of our suppliers, we share this information immediately with you according to the Art. 33 of the REACH directive.
- We reach a separate agreement with all non-EU product suppliers, because they are not automatically subject to the REACH information obligation. Therefore, we let our non-EU suppliers assure in a written form that we will be informed immediately if one of the delivered products surpasses the mass concentration level of 0.1 % of a SVHC-material.

The products of IEF-Werner GmbH that contain SVHC substances in a mass concentration of >0.1% are listed under the following link in the document "SVHC products IEF Werner GmbH".
